## EDUCATION

**Sandip University, Nashik**                                                                                               *Jun 2022 - Jul 2025*

-        BCA (Bachelor of Computer Applications)          Curr_CGPA 8.09/10          84%

**Pw Skill, Bengaluru**                                                                                                         *Jul 2023 - Sep2024*
-        full stack development

## SKILLS

**Technical Skills  :**        C /C++ Java ,  JavaScript  , TypeScript ,   MySQL ,  HTML , CSS , Tailwind CSS , Bootstrap
**,**                                    React Js ,     Node Js , Mongo DB , Express JS , DSA , API , Restful API , Git .

**Tools Used    :**        GitHub , VS code , Material UI , npm , Daisy UI , DSA ,  Generative AI tools ,Android Studio

## Experience

**EduVersity In collaboration  with Wipro technologies .**                                *Aug2024 - Nov 2024*
**Full stack development Industrial Internship**   :  This internship offered hands-on experience in building and maintaining web applications, using both front-end and back-end technologies, collaborating with a team, and applying best practices in full stack development.

**Web Development Internship** at   Cipher Byte Technologies                         *Jun 2024 - Jul 2024*
- This internship enhanced my technical skills in web development, involving both front-end and back-end technologies across various projects .

**Android Application development  Internship** at Engineer Core                 *Jun 2023 - Aug 2023*
- This internship enhanced my fundamental skills in Android development, including Android Studio, Android SDK, and core development principles.

## PROJECTS

- (**CoinGecko CryptoTracker**)   -      Crypto Tracker is an API service for tracking cryptocurrency prices and features, allowing users to fetch data on all available coins, track their prices, and analyse various features.

- (**Spotify Application**) -    Allows users to create accounts and log in.  The application automatically detects and organizes music files in your device, providing an easy and user-friendly interface similar to Spotify.

- (**Hangman React Application** ) -      Hangman is a classic word-guessing game where players guess a hidden word by suggesting letters. This project modernizes the game using React library .

- ( **Tier List Application** ) -    This drag-and-drop tier list app allows users to create and customize their own tier lists, easily sorting items into different tiers by dragging and dropping

- (**To-do-list App , Tic-tac-toe App , Snake game , You tube Clone , Red Bus Clone , Portfolio web application , Netflix clone and** Similar to more than 20 projects .  )

## ACHIEVEMENTS

- Received Participation Certificate in All India NCAT with an overall rank of 1022.

- Solved 200+ DSA problems on LeetCode using Java & JavaScript, with more ongoing.

- Earned a Participation Certificate in Temperature Design from Sandip University.

- I completed an internship at Edu Net focused on server connectivity with DBMS and React.js
